

MMXM MODEL

*THIS IS JUST BASED ON MY UNDERTANDING OF THE MARKET
MAKER BUY/SELL MODEL AND HOW I TRADE IT*

MMSM = MARKET MAKER SELL MODEL

MMBM = MARKET MAKER BUY MODEL

WHAT THE MMXM LOOKS LIKE?

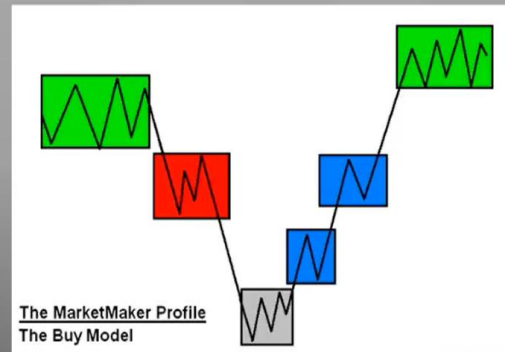

THE MMXM COMES IN DIFFERENT FORMS...THE CLASSIC MMXM PATTERN WE ARE ALL INTRODUCED TO IS THIS:

Inside Fractals: ICT Buy Model

Accumulation To Distribution

- 1) Consolidation
- 2) The Run To Support
- 3) The Smart Money Reversal
- 4) Accumulation The Low Risk Buy
- 5) *Re-accumulation
- 6) Distribution

* Re-accumulation
Or
* Re-distribution

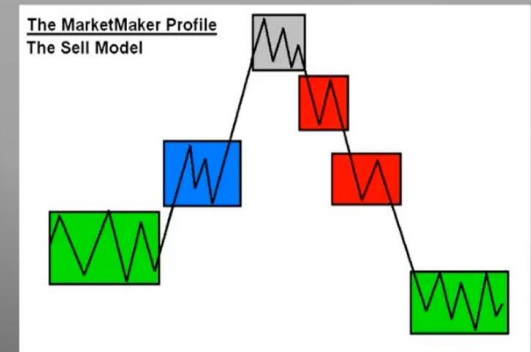

Michael J. Huddleston
TheInnerCircleTrader.com

Inside Fractals: ICT Sell Model

Accumulation To Distribution

- 1) Consolidation
- 2) The Run To Resistance
- 3) The Smart Money Reversal
- 4) Distribution The Low Risk Sell
- 5) *Re-distribution
- 6) Distribution

* Re-distribution
Or
* Re-accumulation

Michael J. Huddleston

OTHER FORMS OF THE MMXM:

MMBM AND MMSM

Introduction To The ICT ATM Method:

It is a stand alone Price Action Pattern.

The Pattern capitalizes on Stop Runs.

Found on 60 minute charts.

Relatively easy to spot quickly & trade.

It is a complete Trading Model for setups.

MMSM AND MMBM

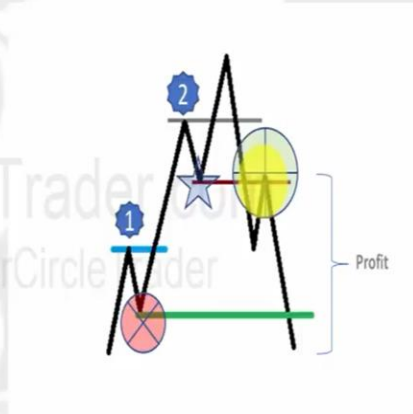

ICT YouTube Forex Library
The ICT ATM Method

The ATM In Bearish Condition:

Scan Price on a 60 minute Chart for a Key High that forms with the Short Term Swing Low broken to the downside.

Ideally if it is part of a continued Swing Higher – with a pair of Swing Highs broken – PRIOR to the Key High formation.

Wait for Price to retrace to the Swing Low Broken PRIOR to the Key High forming.

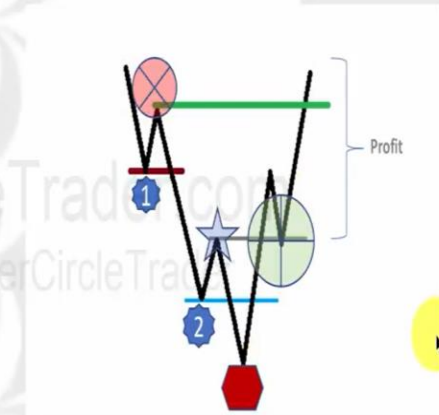

ICT YouTube Forex Library
The ICT ATM Method

The ATM In Bullish Condition:

Scan Price on a 60 minute Chart for a Key Low that forms with the Short Term Swing High broken to the upside.

Ideally if it is part of a continued Swing Lower – with a pair of Swing Lows broken – PRIOR to the Key Low formation.

Wait for Price to retrace to the Swing High Broken PRIOR to the Key Low forming.

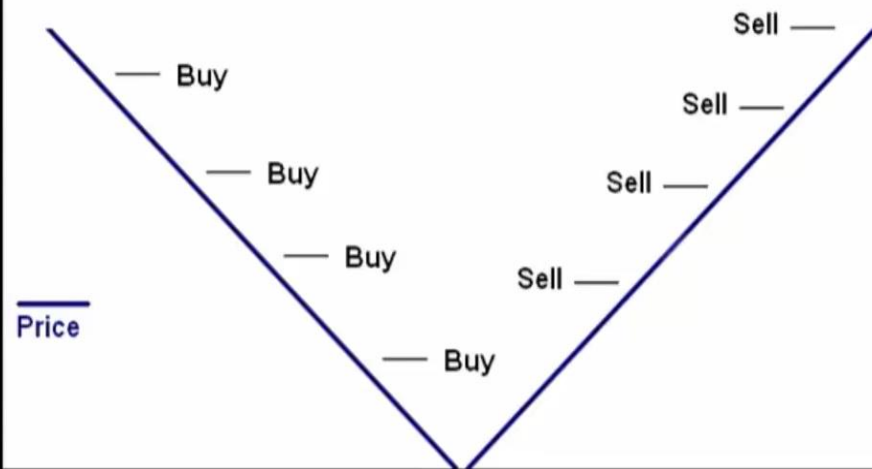

MMBM

How Commercials Trade

Standard Commercial Accumulation Phase

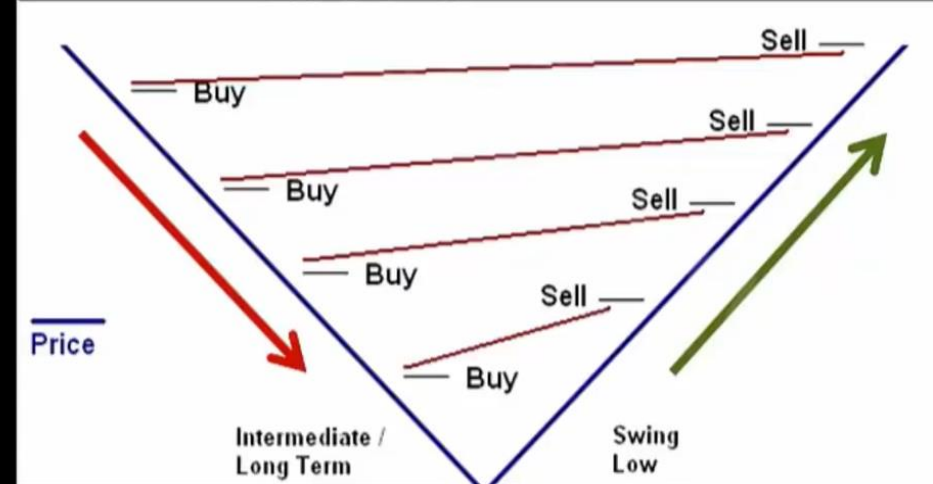

Commercial Traders are very early in the moves and provide the "market" for us small retailers to speculate in. As markets decline in price, the Large Commercial Traders accumulate large net long positions all the while prices makes lower lows. When the market finally reaches a low, as the market rallies higher... the same Large Commercial Traders distribute the large net long position and the cycle repeats for the price swing being engineered for a Swing Lower... in the near future.

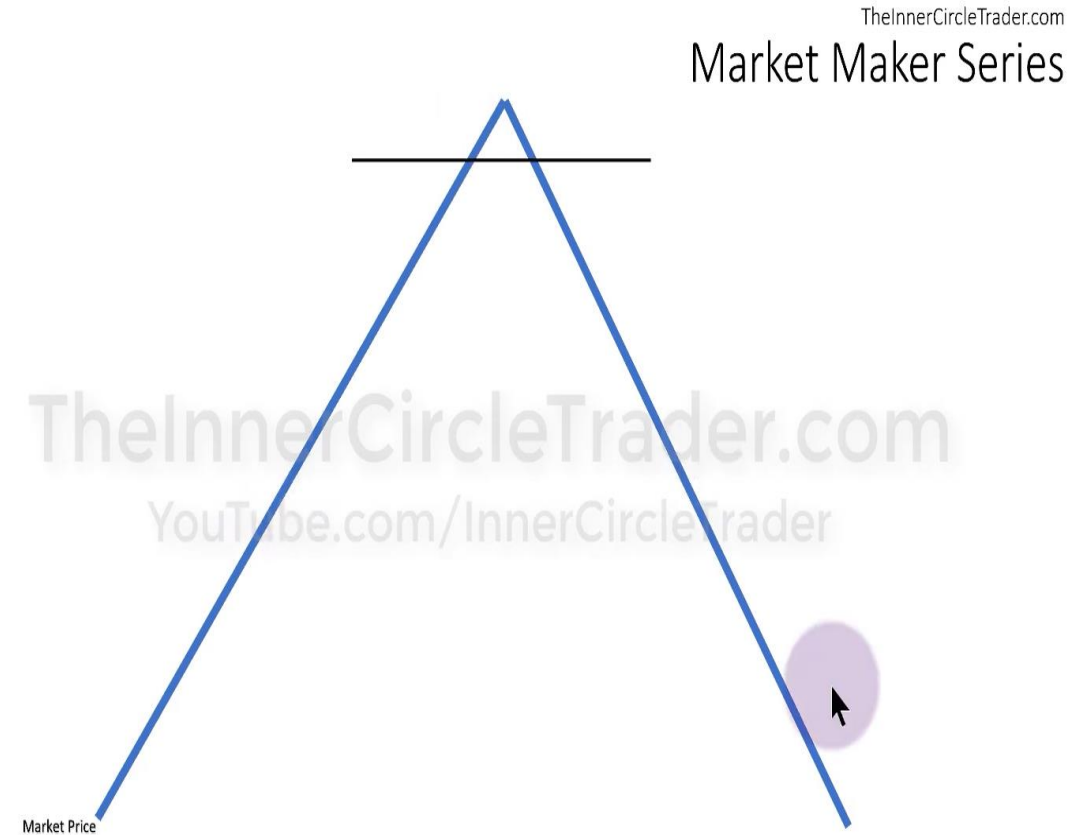

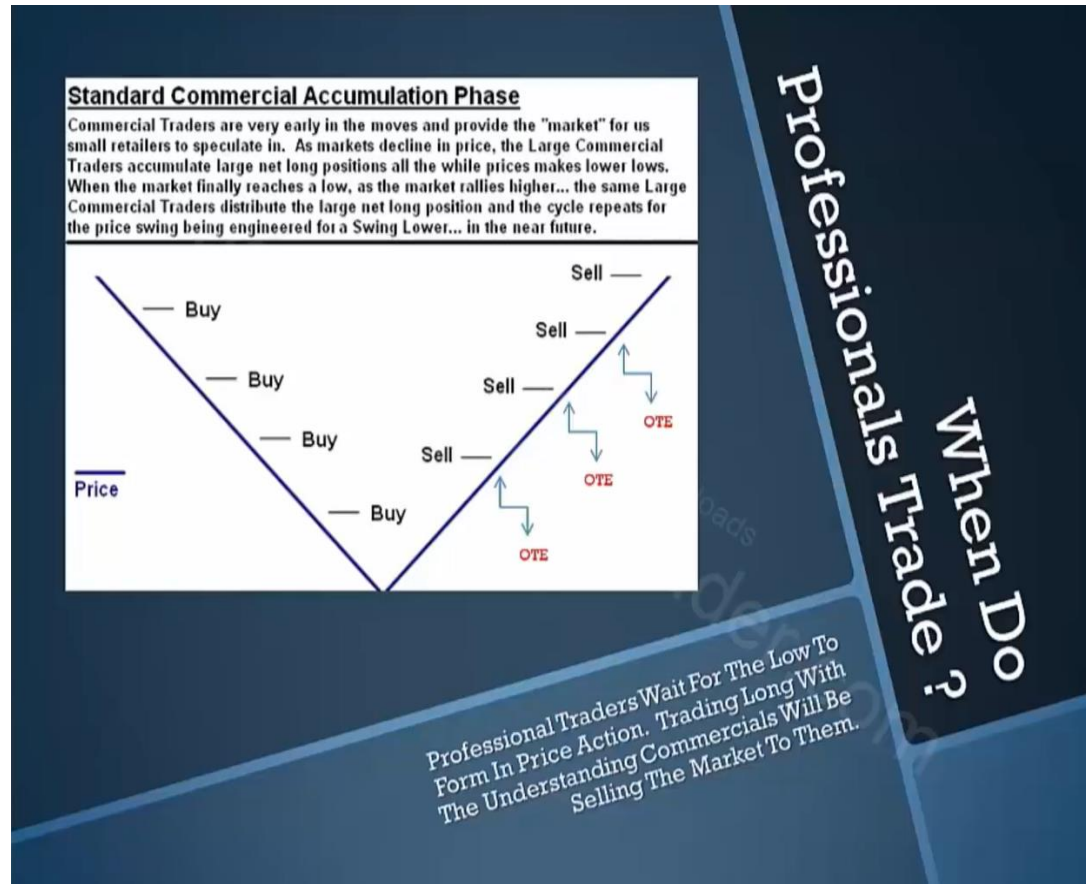

How Commercials Trade

Standard Commercial Accumulation Phase

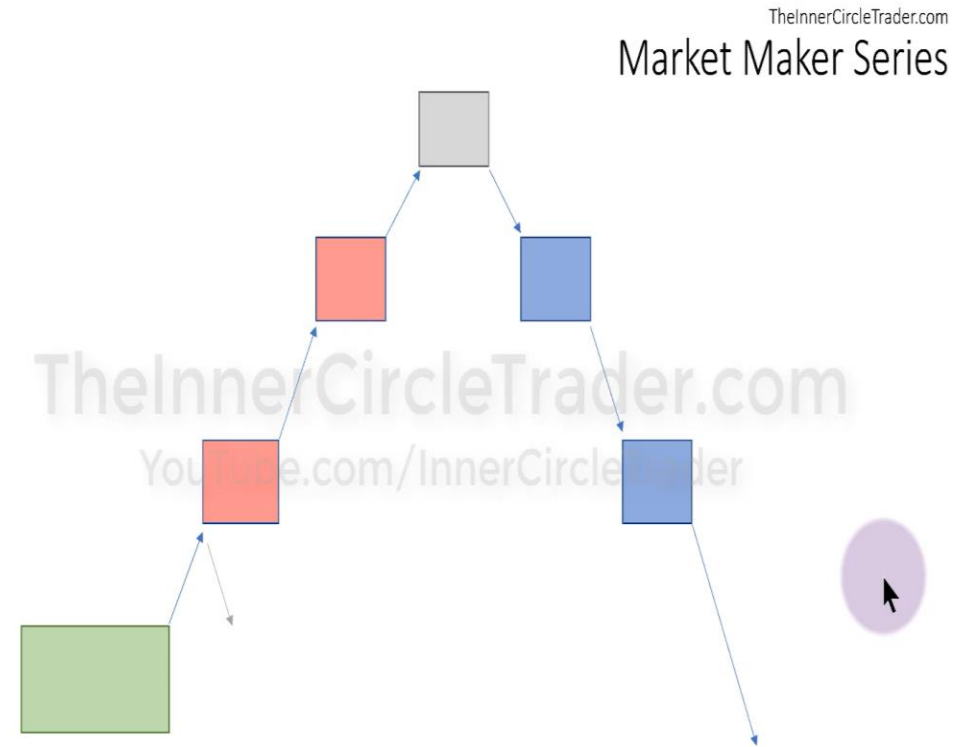

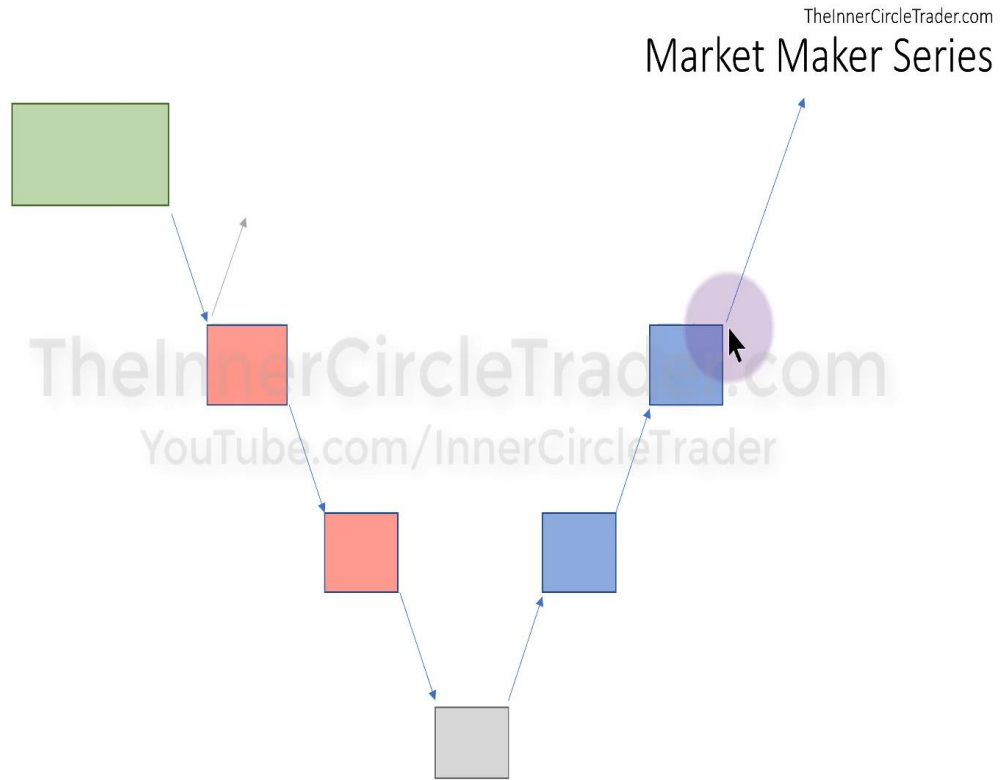

Commercial Traders are very early in the moves and provide the "market" for us small retailers to speculate in. As markets decline in price, the Large Commercial Traders accumulate large net long positions all the while prices makes lower lows. When the market finally reaches a low, as the market rallies higher... the same Large Commercial Traders distribute the large net long position and the cycle repeats for the price swing being engineered for a Swing Lower... in the near future.

MMSM

The Swing In SMT Setup

Price will Swing Higher into a Key Resistance and the Short will be traded on the 4 hour and or 60 minute chart for the setup and the entry taken on a 5 minute chart Turtle Soup Sell and or OTE Sell Pattern. When the Daily Fractal Swing High forms look for Judas Rallies to Short into for additional entry points.

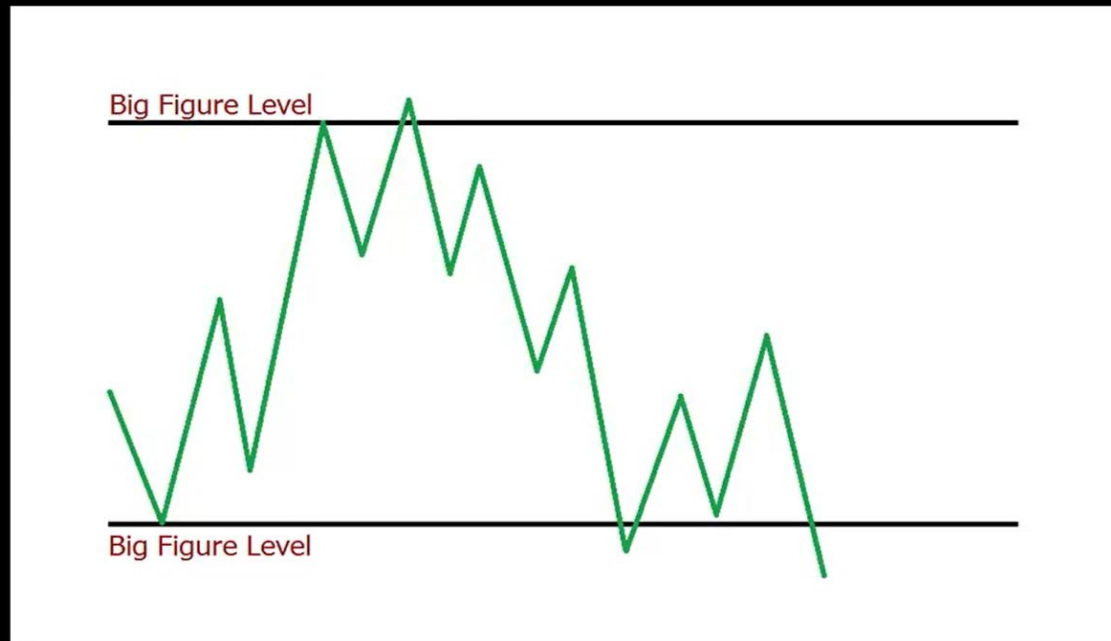

The SMT Swing Short Setup

Swing Trade**

MMSM

The Basic Big Figure Model

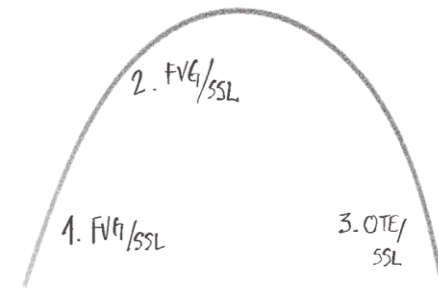

CREDIT TO: RAEFX

Buying areas MM SM:

sell side → Buyside

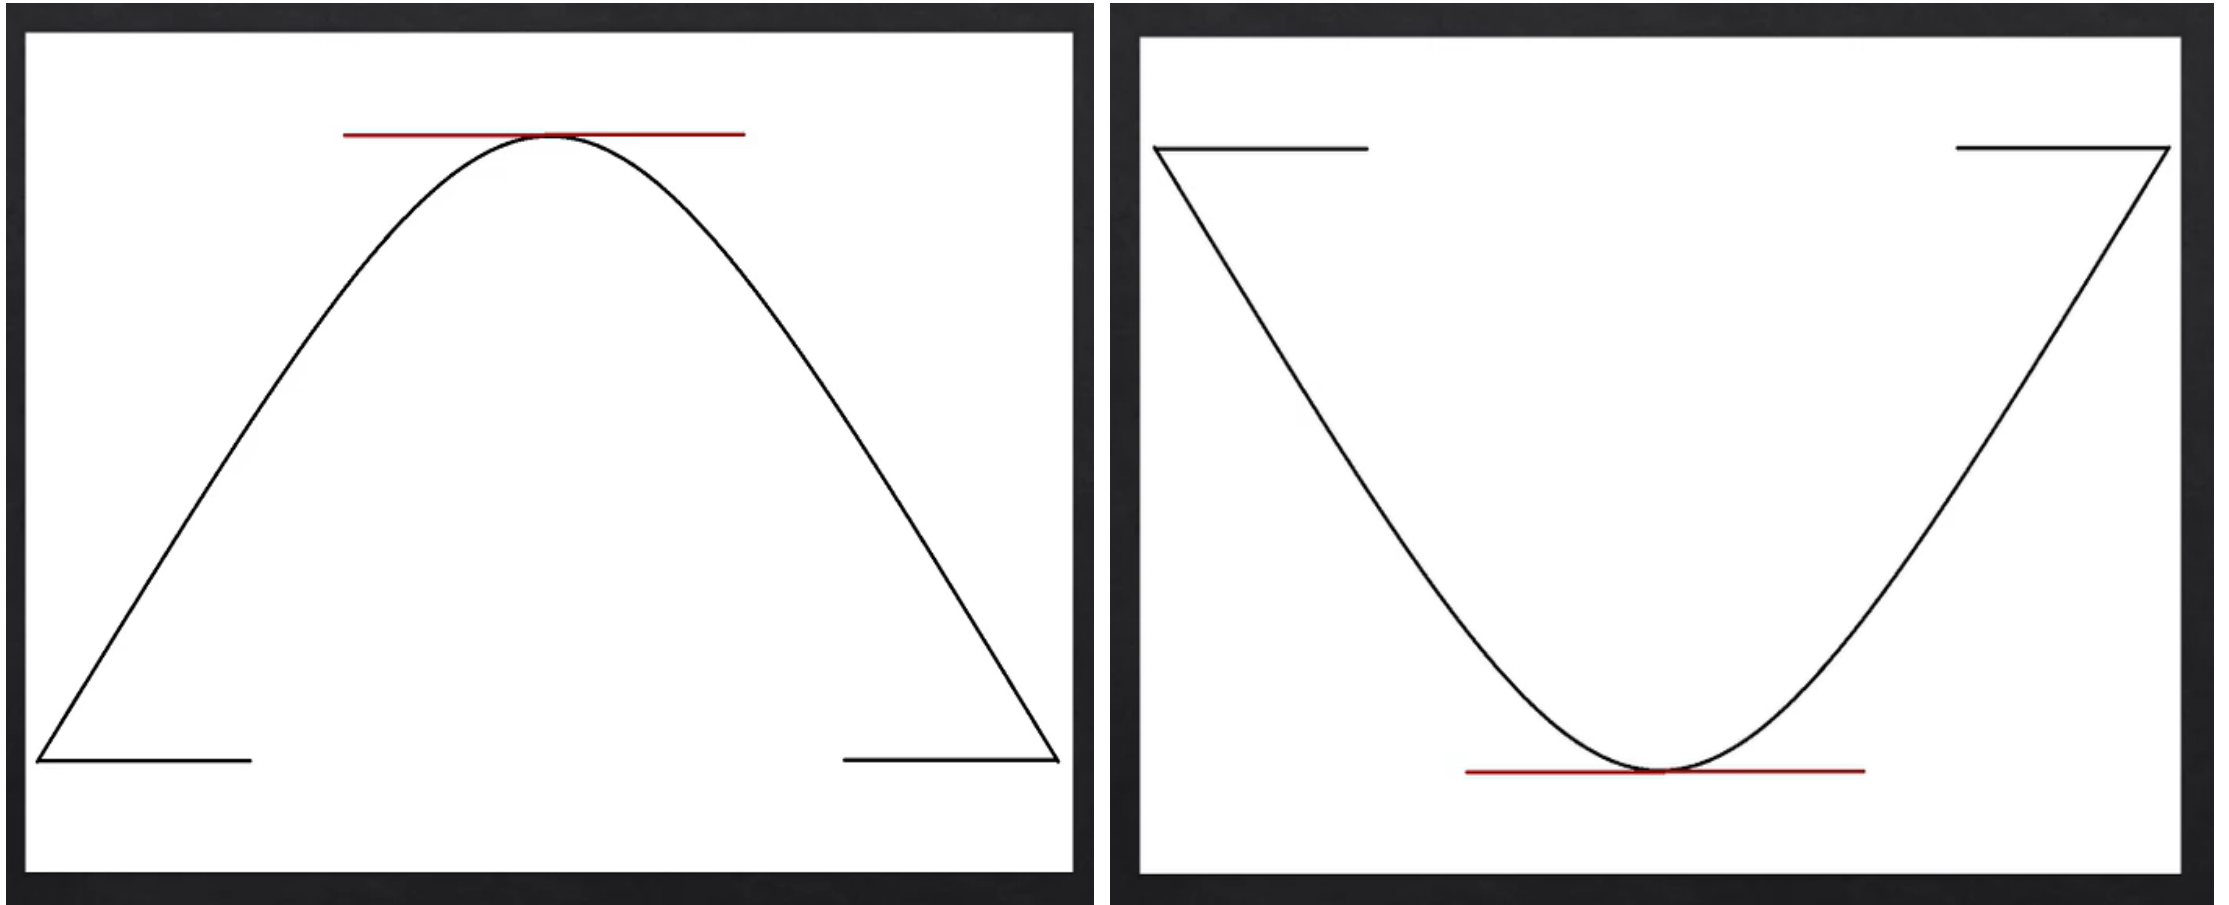

Each box in the sell model should match an opposing box on the buyside

HTF Level	1, 2, 3
Weekly	= D / 4H
Daily	= 4H / 1H
4H	= 1H / 15m
1H	= 15m / 5m

THIS IS HOW I LIKE TO VIEW IT: (BECAUSE IT WILL ALWAYS COME IN DIFFERENT FORMS BUT WILL ULTIMATELY LOOK LIKE THIS)

I VISUALIZE EVERY PRICE SWING AS A MMXM (YOU WILL SEE WHAT I MEAN IN THE EXAMPLES SECTION)...PRICE MOVES FROM MMBM TO MMSM TO MMBM TO MMSM CONTINUOUSLY

HOW TO TRADE THE MMXM

SMART MONEY REVERSAL

- This is the turning point of the MMXM
- It can only happen in two ways: A Raid or Failure Swing

SMART MONEY REVERSAL: RAID

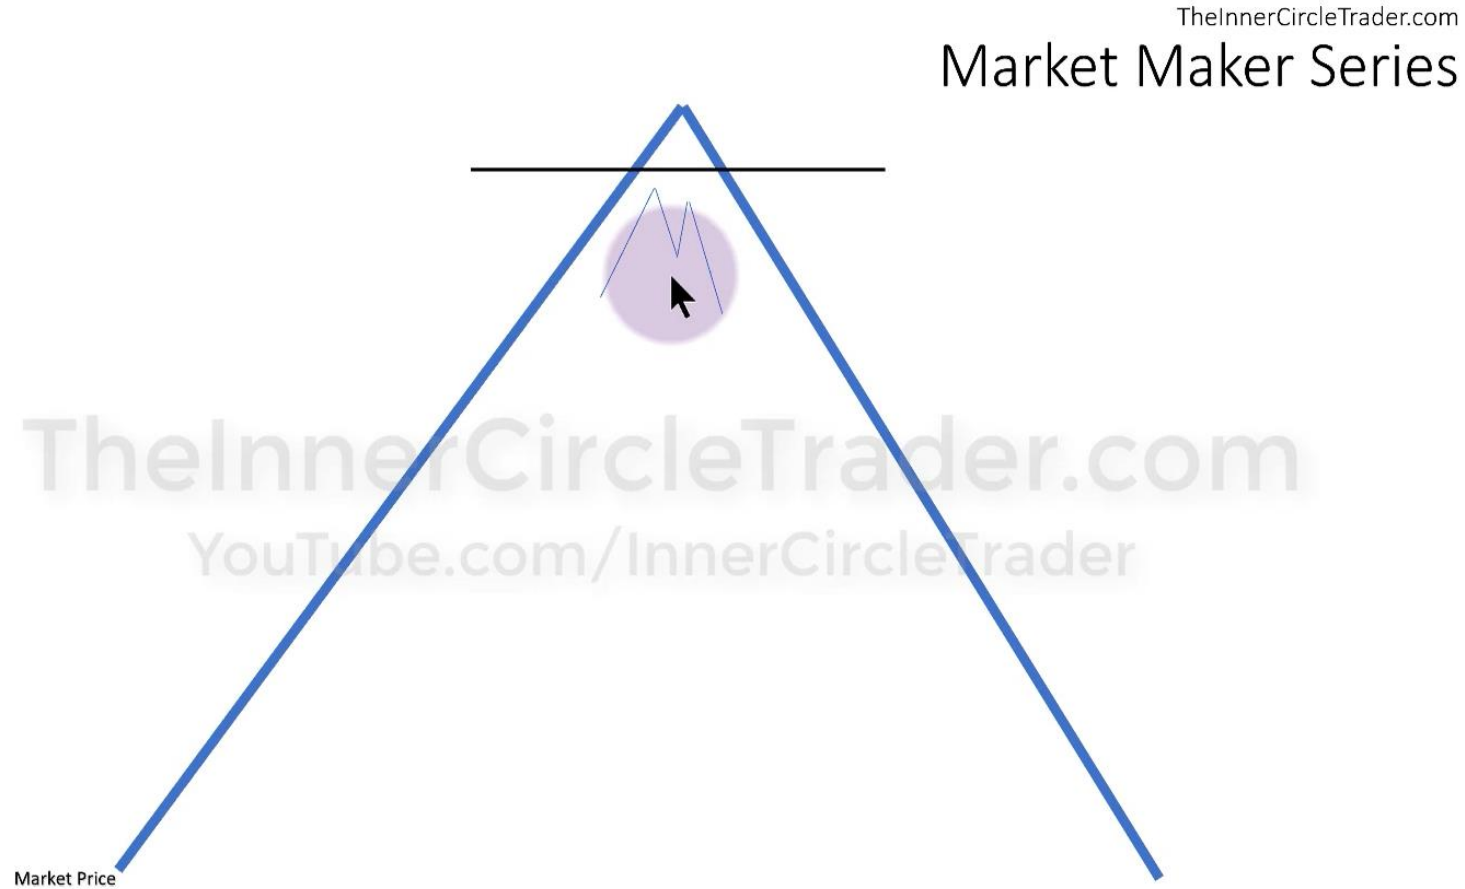

- Turtle Soup into key level and if you miss it or unsure of how far it will raid, you can wait for a breaker to form and enter there...
- The breaker can also be used to add another entry to the Raid
- If raid entry got stopped out, enter with smaller risk at Breaker

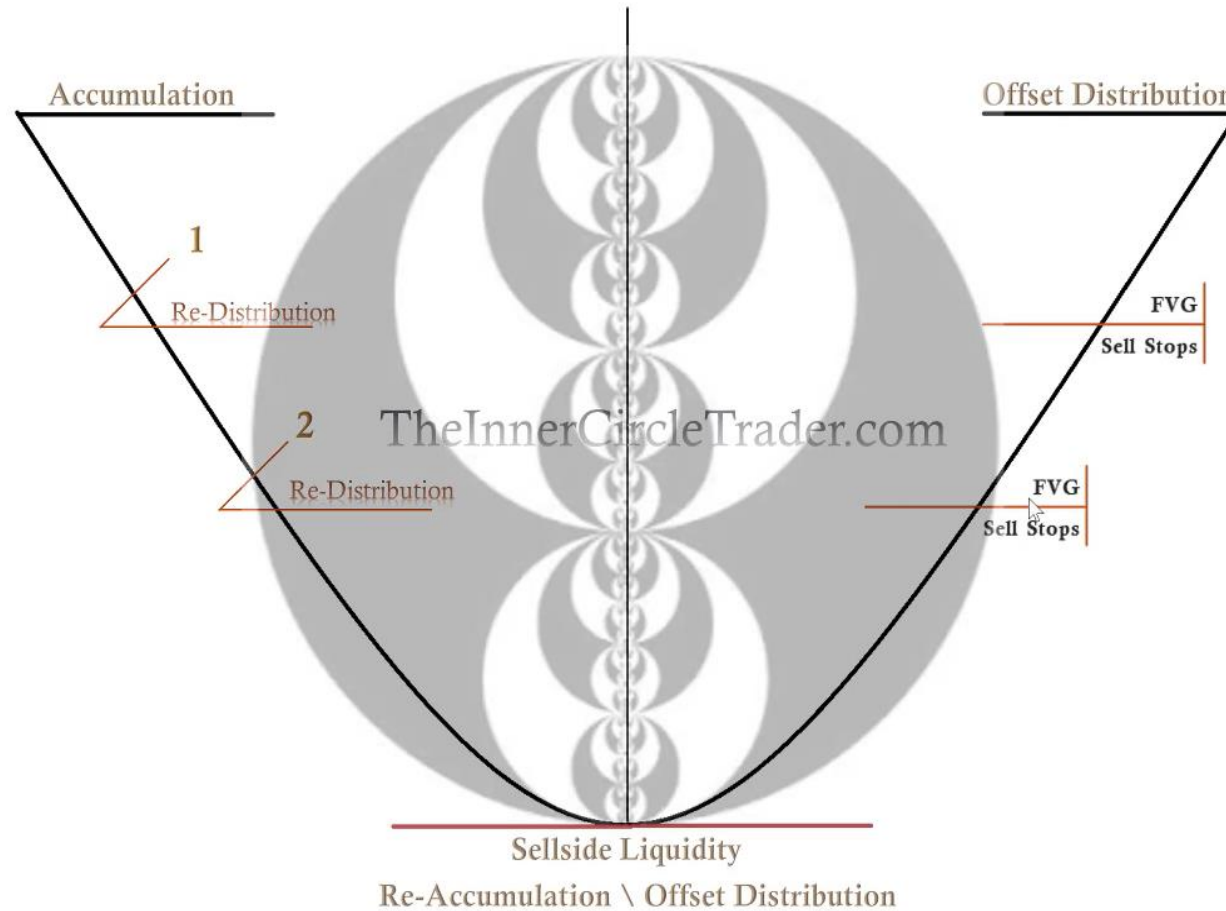

SMART MONEY REVERSAL: FAILURE SWING

-Compare with closely correlated pair and lookout for SMT

LOW RISK BUY/ SELL OR RE-ACCUMULATION/DISTRIBUTION ENTRIES (AFTER THE SMART MONEY REVERSAL HAS BEEN FORMED)

IN THE AREAS OF REACCUMULATION/REDISTRIBUTION,
THE TYPE OF ENTRIES/SETUPS YOU GET ARE:

- FVG
- SELL STOPS
- BUY STOPS
- OTE
- OB + FVG
- BREAKER (+FVG)

TOP DOWN ANALYSIS AND TIMEFRAMES IN A NUTSHELL

WEEKLY CHART – WHAT IS THE DRAW ON LIQUIDITY AND WHERE IS THE NEXT WEEKLY CANDLE LIKELY TO EXPAND TO???

DAILY CHART FOR KEY LEVELS – PD ARRAYS BASICALLY AND DAILY BIAS

H4 FOR PD ARRAYS TOO

H1 FOR WHERE WE ARE IN THE CURRENT MMXM UNDERWAY

M15 FOR TIME OF DAY ENTRIES AND DAY TRADES GENERALLY

M1 AND **M5** FOR INTRADAY MMXM AND LOW RISK TRADES

(THIS ISN'T THE ONLY WAY TO DO IT, YOU CAN BE FLEXIBLE AND DO WHAT SUITS YOU BEST)

SOME TIMEFRAME
COMBINATIONS (YOU CAN BE
FLEXIBLE WITH THIS TOO)

MONTHLY LEVEL -> DAILY/H4 MMXM

WEEKLY LEVEL -> H4/H1 MMXM

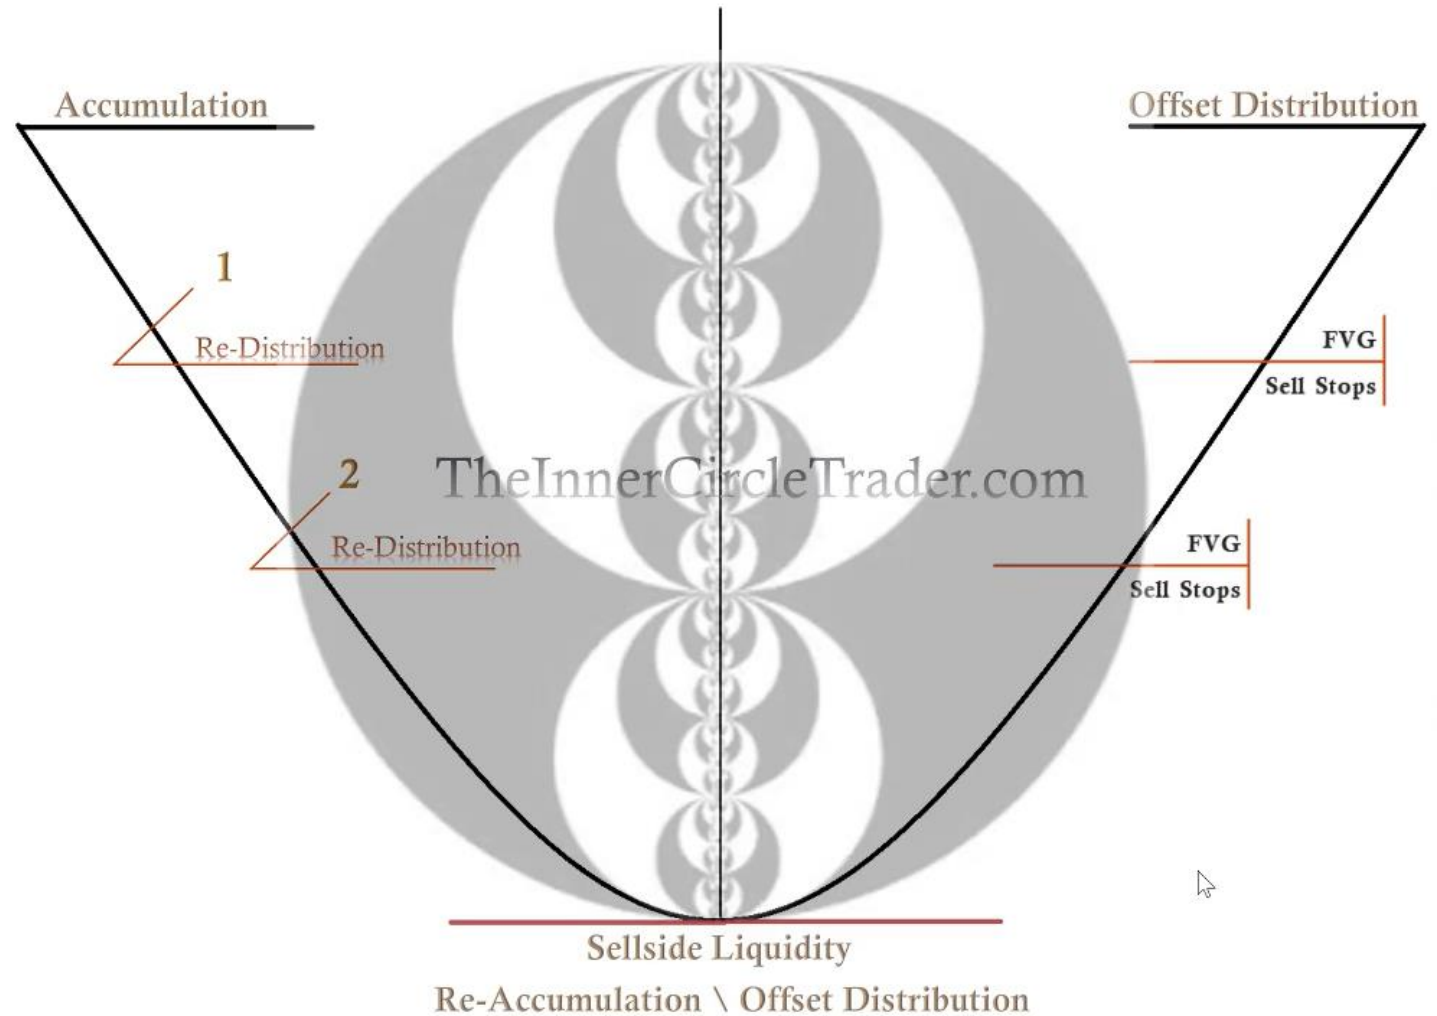

DAILY LEVEL -> H1/M15/M5 MMXM

H4 LEVEL -> H1/M15/M5 MMXM

H1 LEVEL -> M1/M5/M15 MMXM

M15 LEVEL -> M1/M5 MMXM

M5 LEVEL -> M1 MMXM

How to spot

- Study swing highs and lows on lower time frames
 - Like daily 3 bars on a 1hr/30min or
 - 1hr/4hr 3 bar swings on like 15/5 min.
- And just look for the MM models that made the market turn.
- Then when you see a MM model, break it down in LTF and find the smaller models inside the larger one.
- Or if you think one is forming... find the smaller models inside the larger one you think is forming to confirm it's really forming.

Do the 3 bar study and just look for models.. and when you find an MMBM/MMSM just the ones inside of it that form it. That's the best way to back test when your still learning in my opinion. And just going in everyday/every week practicing with live data and at the end of the day/week break the PA down through all timeframe and find the MM models that formed inside that daily and weekly range.

FRACTALS

CREDIT TO:

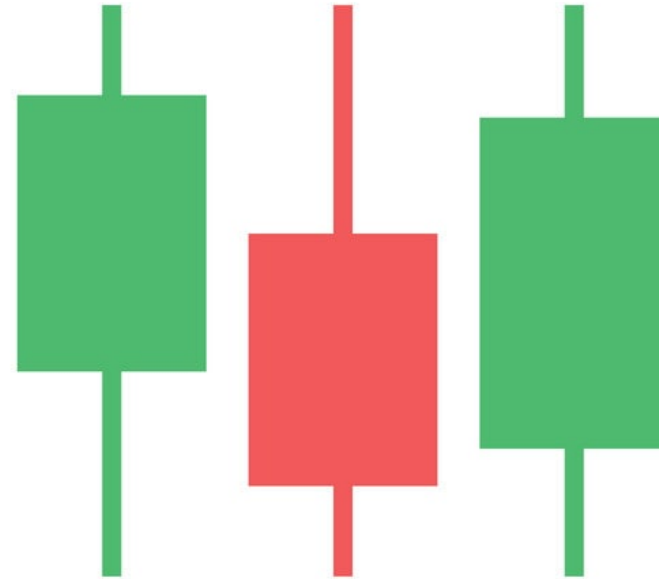

Telegram: @outsidebox

Discord: OutsideBox#1986

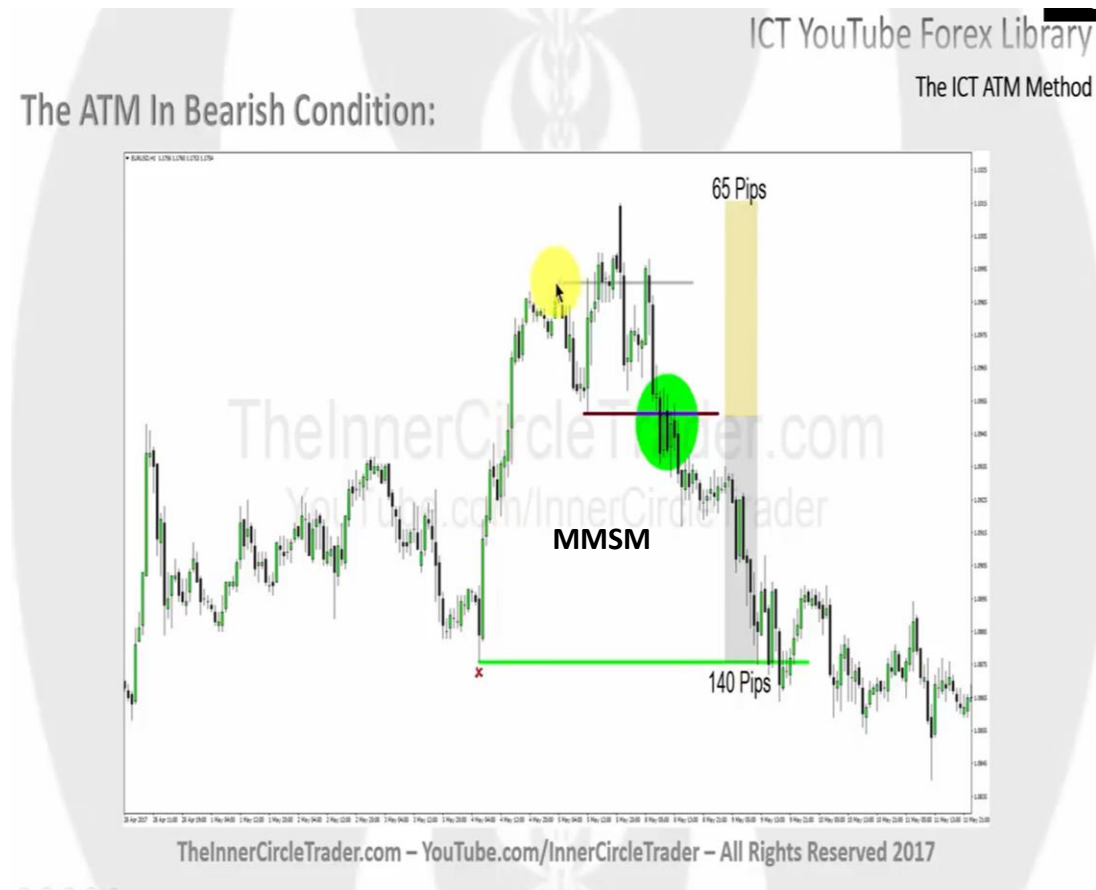

- MMXM are fractal patterns with fractals repeating inside, on all timeframes
- There are four types of fractals:
 - MMSM
 - MMBM
 - MMSM OTE
 - MMBM OTE
- All of these fractals are used to make one of the larger ones
- PA will blend model to model
- All the models will use OHLC levels of Monthly/Weekly/Daily
- MWD-levels are most significant for the algo
- Monthly: Lookback OHLC last 3 months
- Weekly: Lookback OHLC last 3 weeks
- All the models will use MWD OHLC levels for turning points and accumulate in consolidations to start models
- Whatever month you're in, look at the last 3 months OHLC
- For the week, look at last 3 weeks OHLC
- For the days last 3 days OHLC
- Study those levels going forward or backtesting, and you'll start to see how the models use them with time for the candle
- You'll be able to see significant highs/lows of daily, weekly, monthly candles at the turning points of those 4 fractals

RULES AND TIPS

- ❖ DON'T TRADE THE MMXM BLINDLY
- ❖ MANAGE RISK WELL
- ❖ TAKE PARTIALS AT BUY/SELL STOPS
- ❖ DON'T FORCE TRADES
- ❖ TAKE TRADES WITHIN A KILLZONE
- ❖ DON'T PLACE STOP LOSS TOO TIGHT (A FEW PIPS OR RIGHT ABOVE/BELOW SMR IS IDEAL)

ICT Power Of 3 – Daily Open:

Price Action Is Fractal In Nature.

The Daily Charts Provide Short Term Institutional Bias.

If Price Action is Bullish:

We Focus On Buying At Or Below The Daily Opening Price.

If Price Action is Bearish:

We Focus On Selling At Or Above The Daily Opening Price.

The Market will gyrate Higher and Lower – relative to the Monthly and or Weekly perspectives. The Highest Probabilities in Trading the Daily Chart is when both the Monthly and Weekly support the trade idea. Focusing on the elements of Time and Price will greatly assist your analysis and overall development as a Technical Analyst.

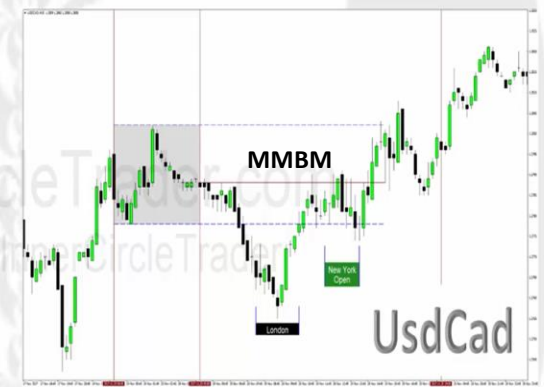

Introducing The ICT Judas Swing

The Price Swing the sets the London Session High or Low is many times a energetic Price Swing.

The run on Stops and or returning to a Key Price Level can be the basis for this quick Price Spike.

Having a Higher Time Frame understanding and implementing that HTF analysis to determine what direction the ICT Judas Swing will form.
