

BREAKAWAY GAPS & THE RE-DELIVERED RE-BALANCED PD ARRAY

A BULLISH BALANCED PRICE RANGE BY DEFINITION IS A PORTION OF PRICE ACTION THAT HAS DELIVERED BUYSIDE > SELLSIDE THEN BUYSIDE AGAIN.

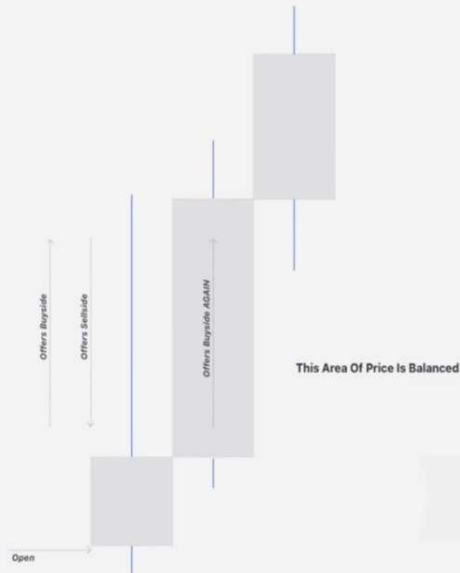

SO, IN SIMPLICITY UP, DOWN & UP AGAIN.

A BEARISH BALANCED PRICE RANGE BY DEFINITION IS A PORTION OF PRICE ACTION THAT HAS DELIVERED SELLSIDE > BUYSIDE THEN SELLSIDE AGAIN.

SO, IN SIMPLICITY DOWN, UP & DOWN AGAIN.

- Bearish FVG

This FVG will stay open because there is a balanced price range below it

BREAKAWAY GAPS & RDRB

RE-DELIVERED RE-BALANCED PD ARRAY

WE CAN ALSO USE THIS AS A PD ARRAY ON ITS OWN, IT DOES NOT NEED TO HAVE AN FVG ABOVE OR BELOW IT TO BE USED.

THIS PD ARRAY IS DEFINED AS RE-DELIVERED RE-BALANCED (RDRB).

RE-DELIVERED RE-BALANCED PD ARRAY

NOW OBVIOUSLY, THERE ARE TIMES WHEN THIS WILL FAIL LIKE EVERY OTHER PD ARRAY BUT FOR THE MOST PART THIS WILL HAVE A LOT SUCCESS IN FRAMING A TRADE AND OR IDENTIFYFYING A BREAKAWAY GAP.

Lesson - 9

FEBRUARY Breakaway, Gaps & BPR

Week - 6th - 035-330

FRIDAY

04

Appointments Breakaway gaps & the Re-delivered Re-balanced PD Array:-

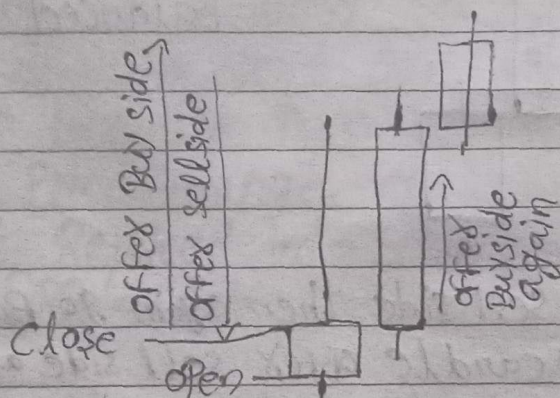

→ A Bullish BPR is a Price action that go Buy side > Sell side then Buy side again.

So, in simply UP, Down & UP again.

→ A Bearish BPR is a Price action that go sell side > Buy side then sell side again.

So, in simply Down, UP & Down again

Example

This area Price is
Balanced

This FVG stay open because there is BPR above it
the "Re-Delivered Re-Balanced" PD Array + Bullish FVG +

→ Above chart the 1st Candle go up it offers Buy side making wick up at this point when it's up it's a full body Candle but then offers sell side again going down & closing. Here inside this wick it offers buy side & sell side with the Next candle open it offers buy side. In simply the ^{first} candle up, down & Next candle up again. If this occurs and Price action start to trade back into this Range again it's already a Balanced Price Range. If there's a FVG below it remain left.

SATURDAY

FEBRUARY

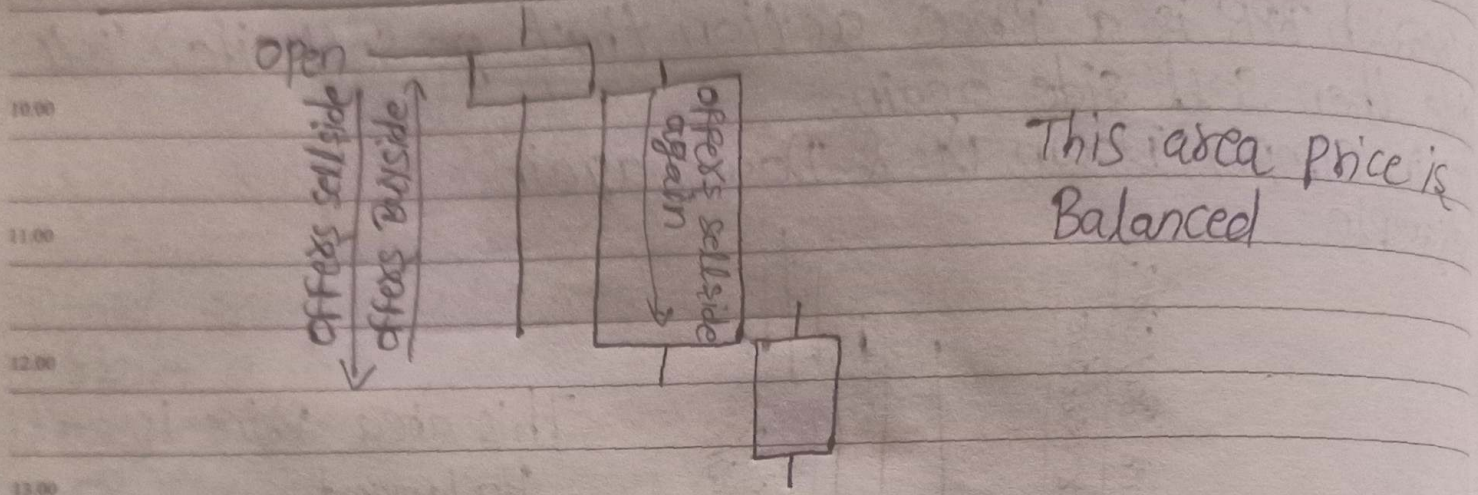

Week - 6th

Appointments

Example

- Bearish FVG

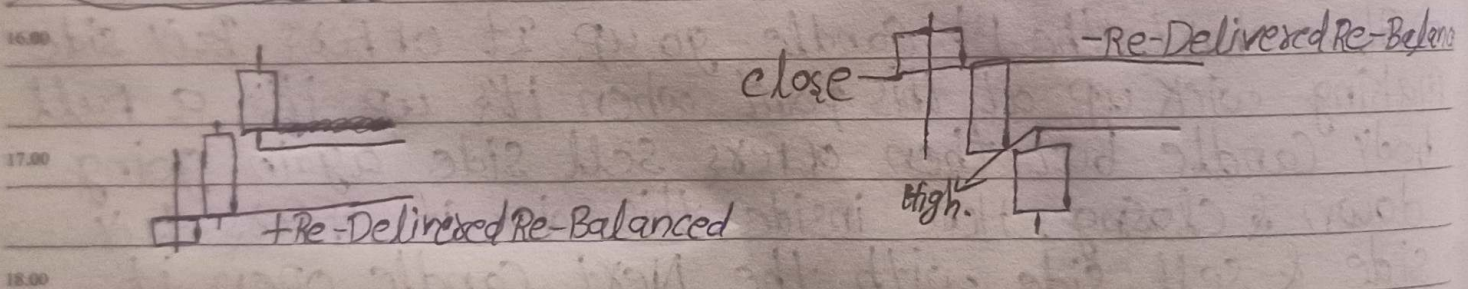

This FVG will stay open because there is a BPR below it the "Re-Delivered Re-Balanced" PD Array

→ The 1st Candle Price offer's sell side then again go Buy side & give closing the Next candle offer sell side again.
→ In simply Price go down then up & again go down.

Example Buy side

Example sell side

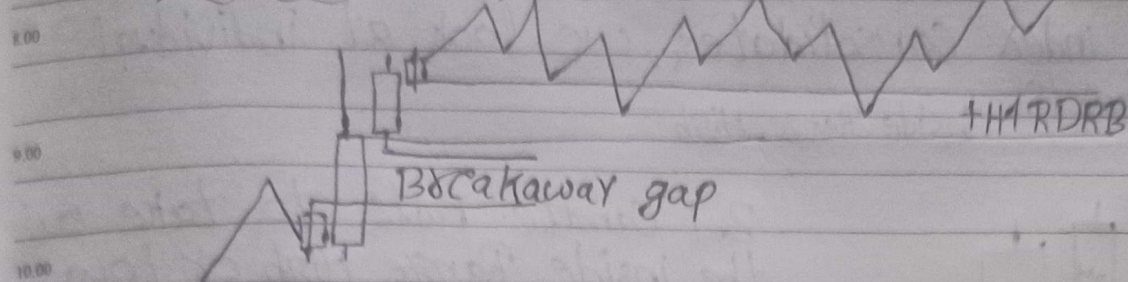

→ we draw a line in this Balanced price line it's a BPR when Price tap this it's highly chance Price ~~give~~ Reject from this area.

→ For sell side draw a line of first candle closing & another line 3rd candle High then we got Re-delivered Re-balance.

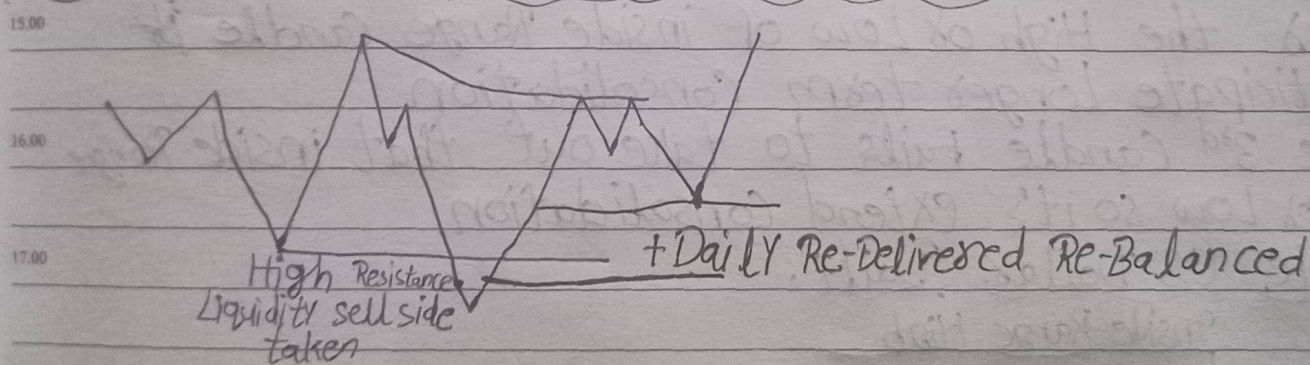

Appointments

Example US Dollar 4h

- There is a FVG but it's a Breakaway gap because it Re-delivered Re-balanced so the Long wick candle delivers up then down & Next candle going up so, it's a up down up balance Price Range.
- Balance Price Range over here this gap doesn't need to get Repriced into this Breakaway gap. Price go from RDRB after tapping.

Another example NZDUSD, Daily chart

- After FVG 2h market the candle give big wick then it's a RDRB & the FVG known as Breakaway gap.
- market Highly chance that After tapping RDRB it give big move.
