

Quarterly Theory

If there is consolidation in Q1, anticipate a Judas Swing in Q2, which purges liquidity while testing a HTF PDA.

If there is expansion in Q1, anticipate consolidation in Q2 and a Judas Swing in Q3, which purges liquidity while testing a HTF PDA.

If you trade with the 1-minute timeframe, you'll need a 15-minute PDA.
If you trade with the 5-minute timeframe, you'll need a 1-hour PDA.
If you trade with the 15-minute timeframe, you'll need a 4-hour PDA.

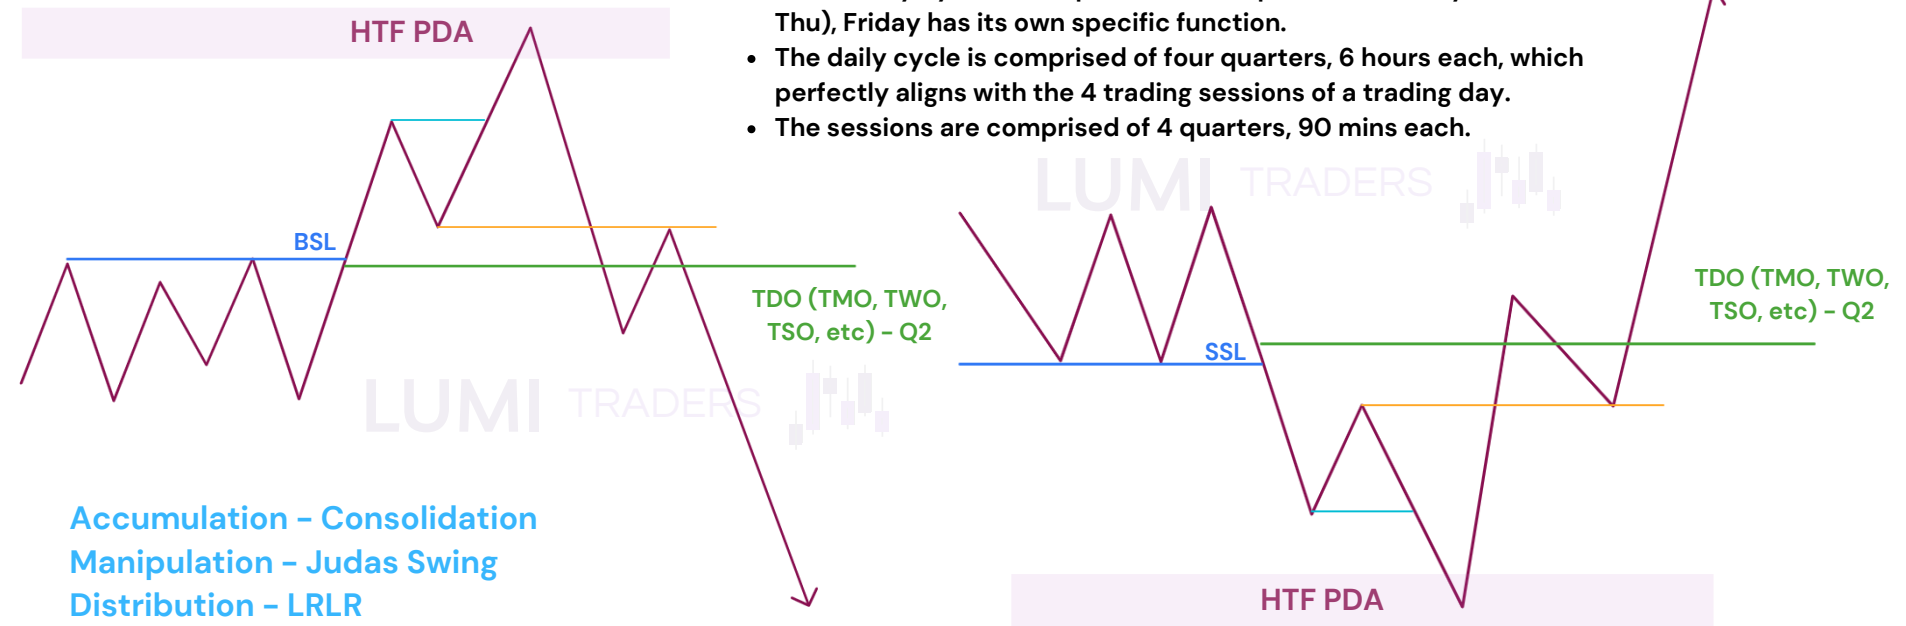

Q1 - A - Accumulation
Q2 - M - Manipulation ✓
Q3 - D - Distribution ✓
Q4 - X - Continuation/Reversal of Previous Q

OR

Q1 - X - Continuation/Reversal of Previous Q
Q2 - A - Accumulation ✓
Q3 - M - Manipulation ✓
Q4 - D - Distribution
✓ - You can trade this.

Specific price openings that function as a time-based filter for identifying Judas Swings/Stop-hunts are known as True Opens.

True Opens occur at the start of cycle Q2 in every cycle.

YEARLY MONTHLY WEEKLY Daily NY MICRO CYCLE

Q1 - Jan-Mar	Q1 - Week 1	Q1 - Mon	Q1 - Asia	Q1 - 09:00-09:22 am
Q2 - Apr-Jun	Q2 - Week 2	Q2 - Tue	Q2 - London	Q2 - 09:22-09:45 am
Q3 - Jul-Sep	Q3 - Week 3	Q3 - Wed	Q3 - NY	Q3 - 09:45-10:08 am
Q4 - Oct-Dec	Q4 - Week 4	Q4 - Thu	Q4 - NY PM	Q4 - 10:08-10:30 am

- The yearly cycle is comprised of four quarters, three months each.
- The monthly cycle is comprised of four quarters, one week each.
- The weekly cycle is comprised of four quarters, one day each (Mon - Thu), Friday has its own specific function.
- The daily cycle is comprised of four quarters, 6 hours each, which perfectly aligns with the 4 trading sessions of a trading day.
- The sessions are comprised of 4 quarters, 90 mins each.

Ever wondered how ICT got the times of his killzones?

18.00 - 00.00 (Asian Session) 6hrs*
00.00 - 06.00 (London Session) 6hrs*
06.00 - 12.00 (NY Session) 6hrs*
12.00 - 18.00 (PM Session) 6hrs*

24hrs added together.

Now... if you divide 6hrs by 4 you'll get 90mins.

Q1: 18.00 - 19.30 | Q2: 19.30 - 21.00 | Q3: 21.00 - 22.30 | Q4: 22.30 - 00.00 (90min Cycles of the Asian Session)

Q1: 00.00 - 01.30 | Q2: 01.30 - 03.00 | Q3: 03.00 - 04.30 | Q4: 04.30 - 06.00 (90min Cycles of the London Session)

Q1: 06.00 - 07.30 | Q2: 07.30 - 09.00 | Q3: 09.00 - 10.30 | Q4: 10.30 - 12.00 (90min Cycles of the NY Session)

Q1: 12.00 - 13.30 | Q2: 13.30 - 15.00 | Q3: 15.00 - 16.30 | Q4: 16.30 - 18.00 (90min Cycles of the PM Session)

Do you see the sequence? Q2 - Q3 are where the killzones are for every 90min cycle.

Why? Q2 is mainly used for manipulation, Q3 is mainly used for distribution.
