

3 STEP LIQUIDITY SYSTEM

LIQUIDITY SIMPLIFIED IN 3 STEPS

3 STEP LIQUIDITY SYSTEM

There are 3 Steps to this strategy

- 1 – Manipulation vs Displacement
- 2 – Timing
- 3 – Entry Models

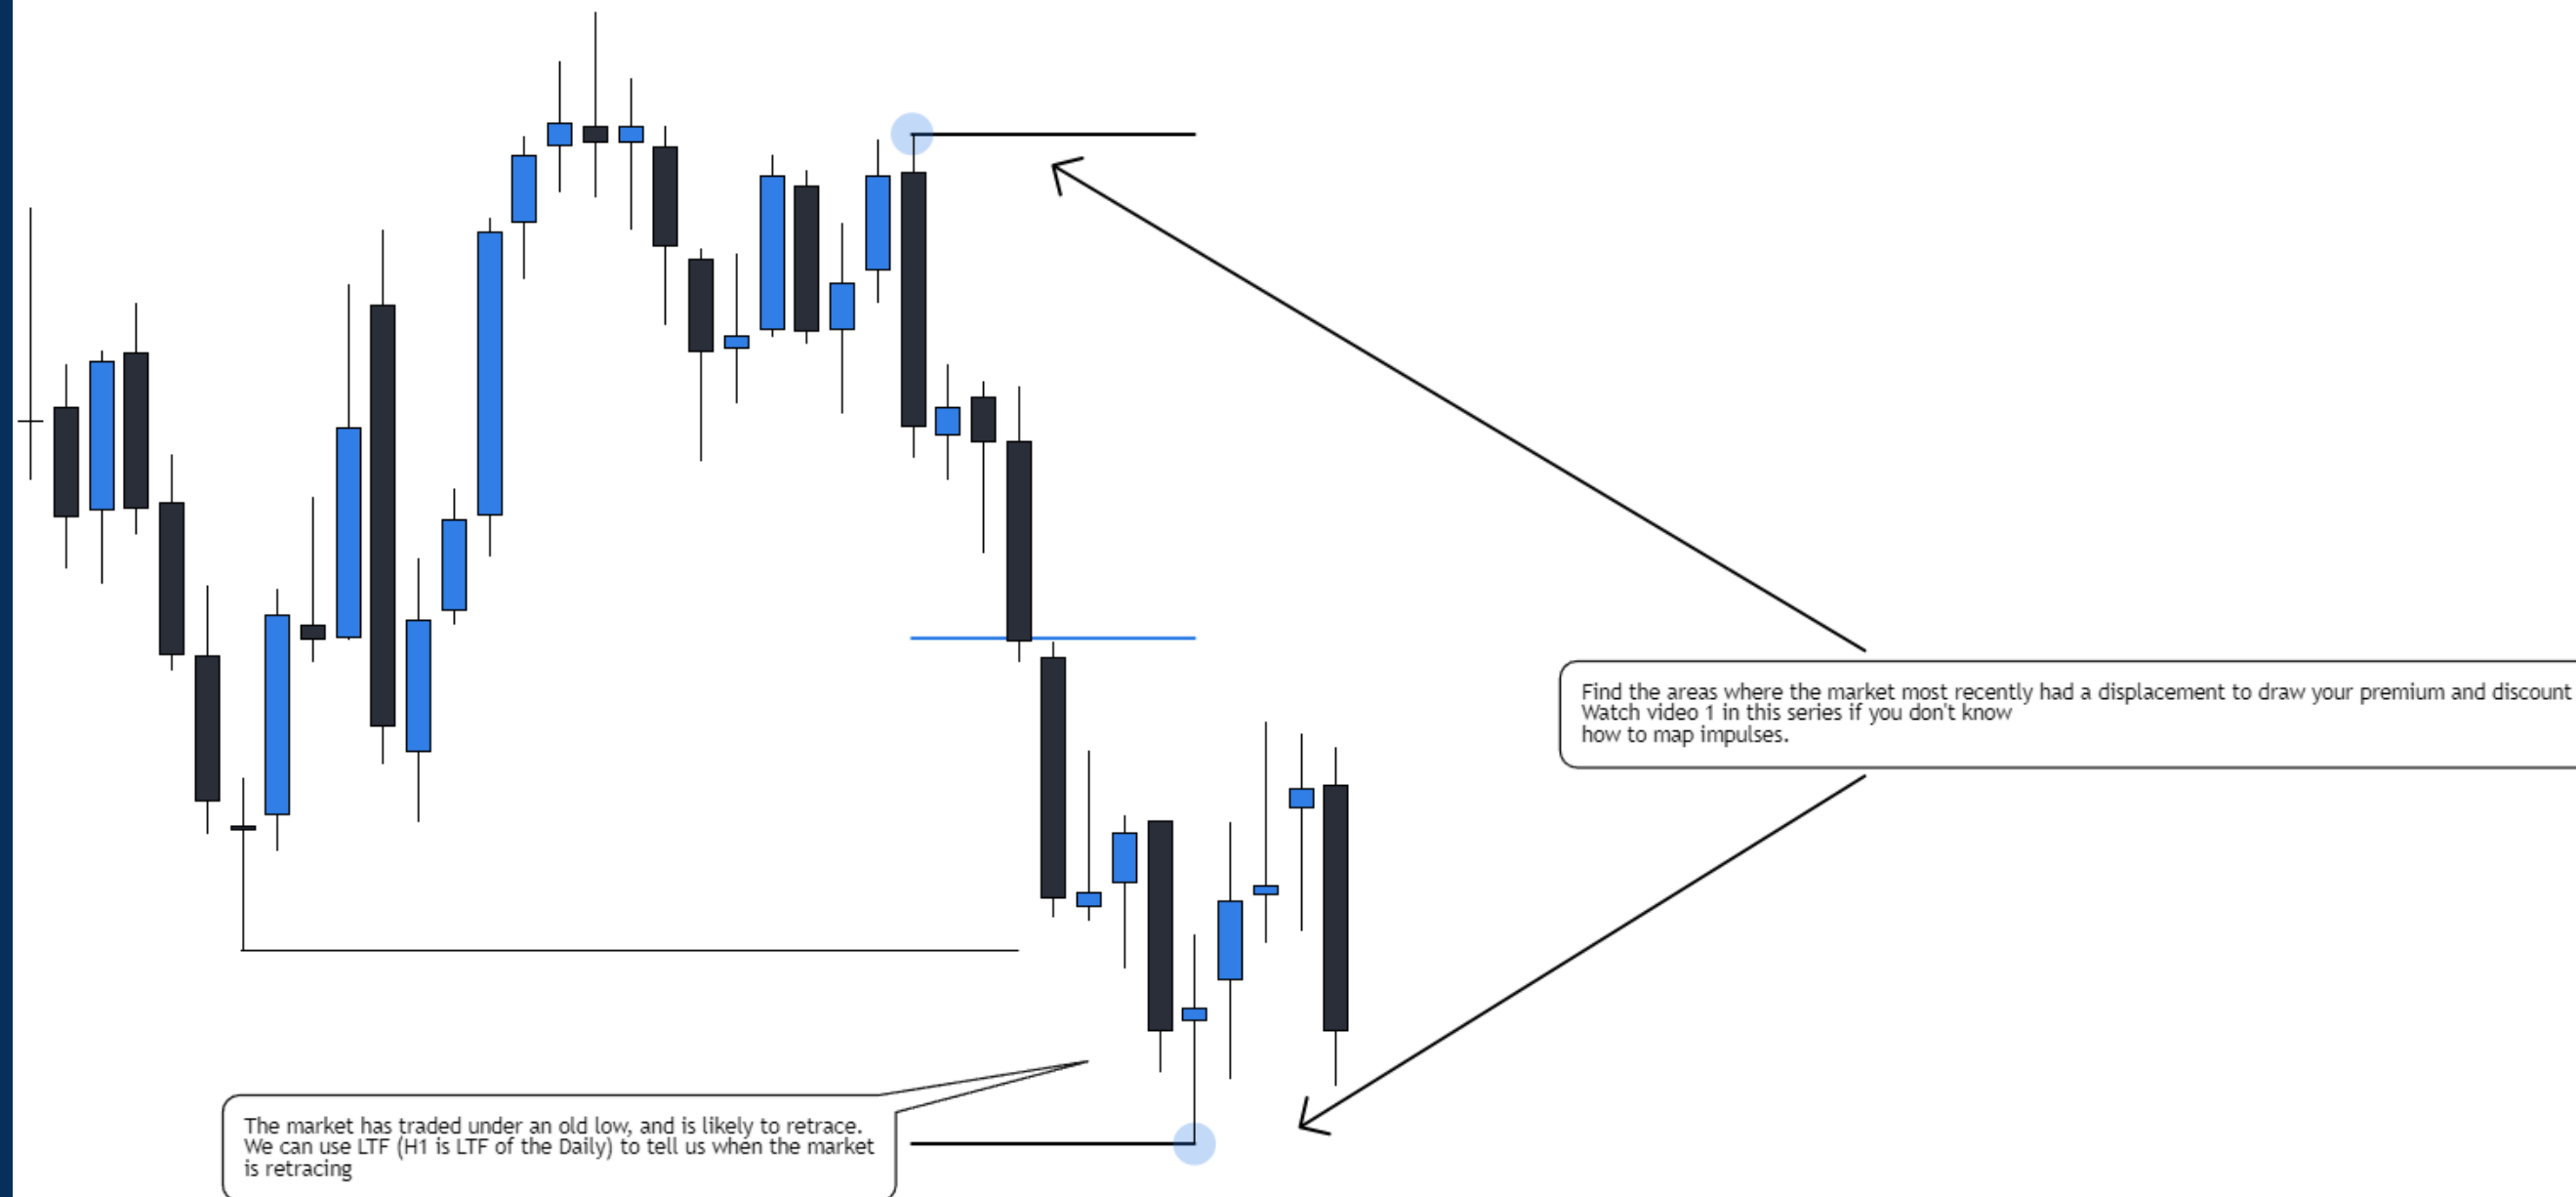

3 STEP LIQUIDITY SYSTEM

Step 1 Manipulation vs Displacement

- Use algorithmic analysis to find your bias.
- Algorithmic analysis = 2 step system found on next few slides

ALGORITHMIC ANALYSIS STEP 1

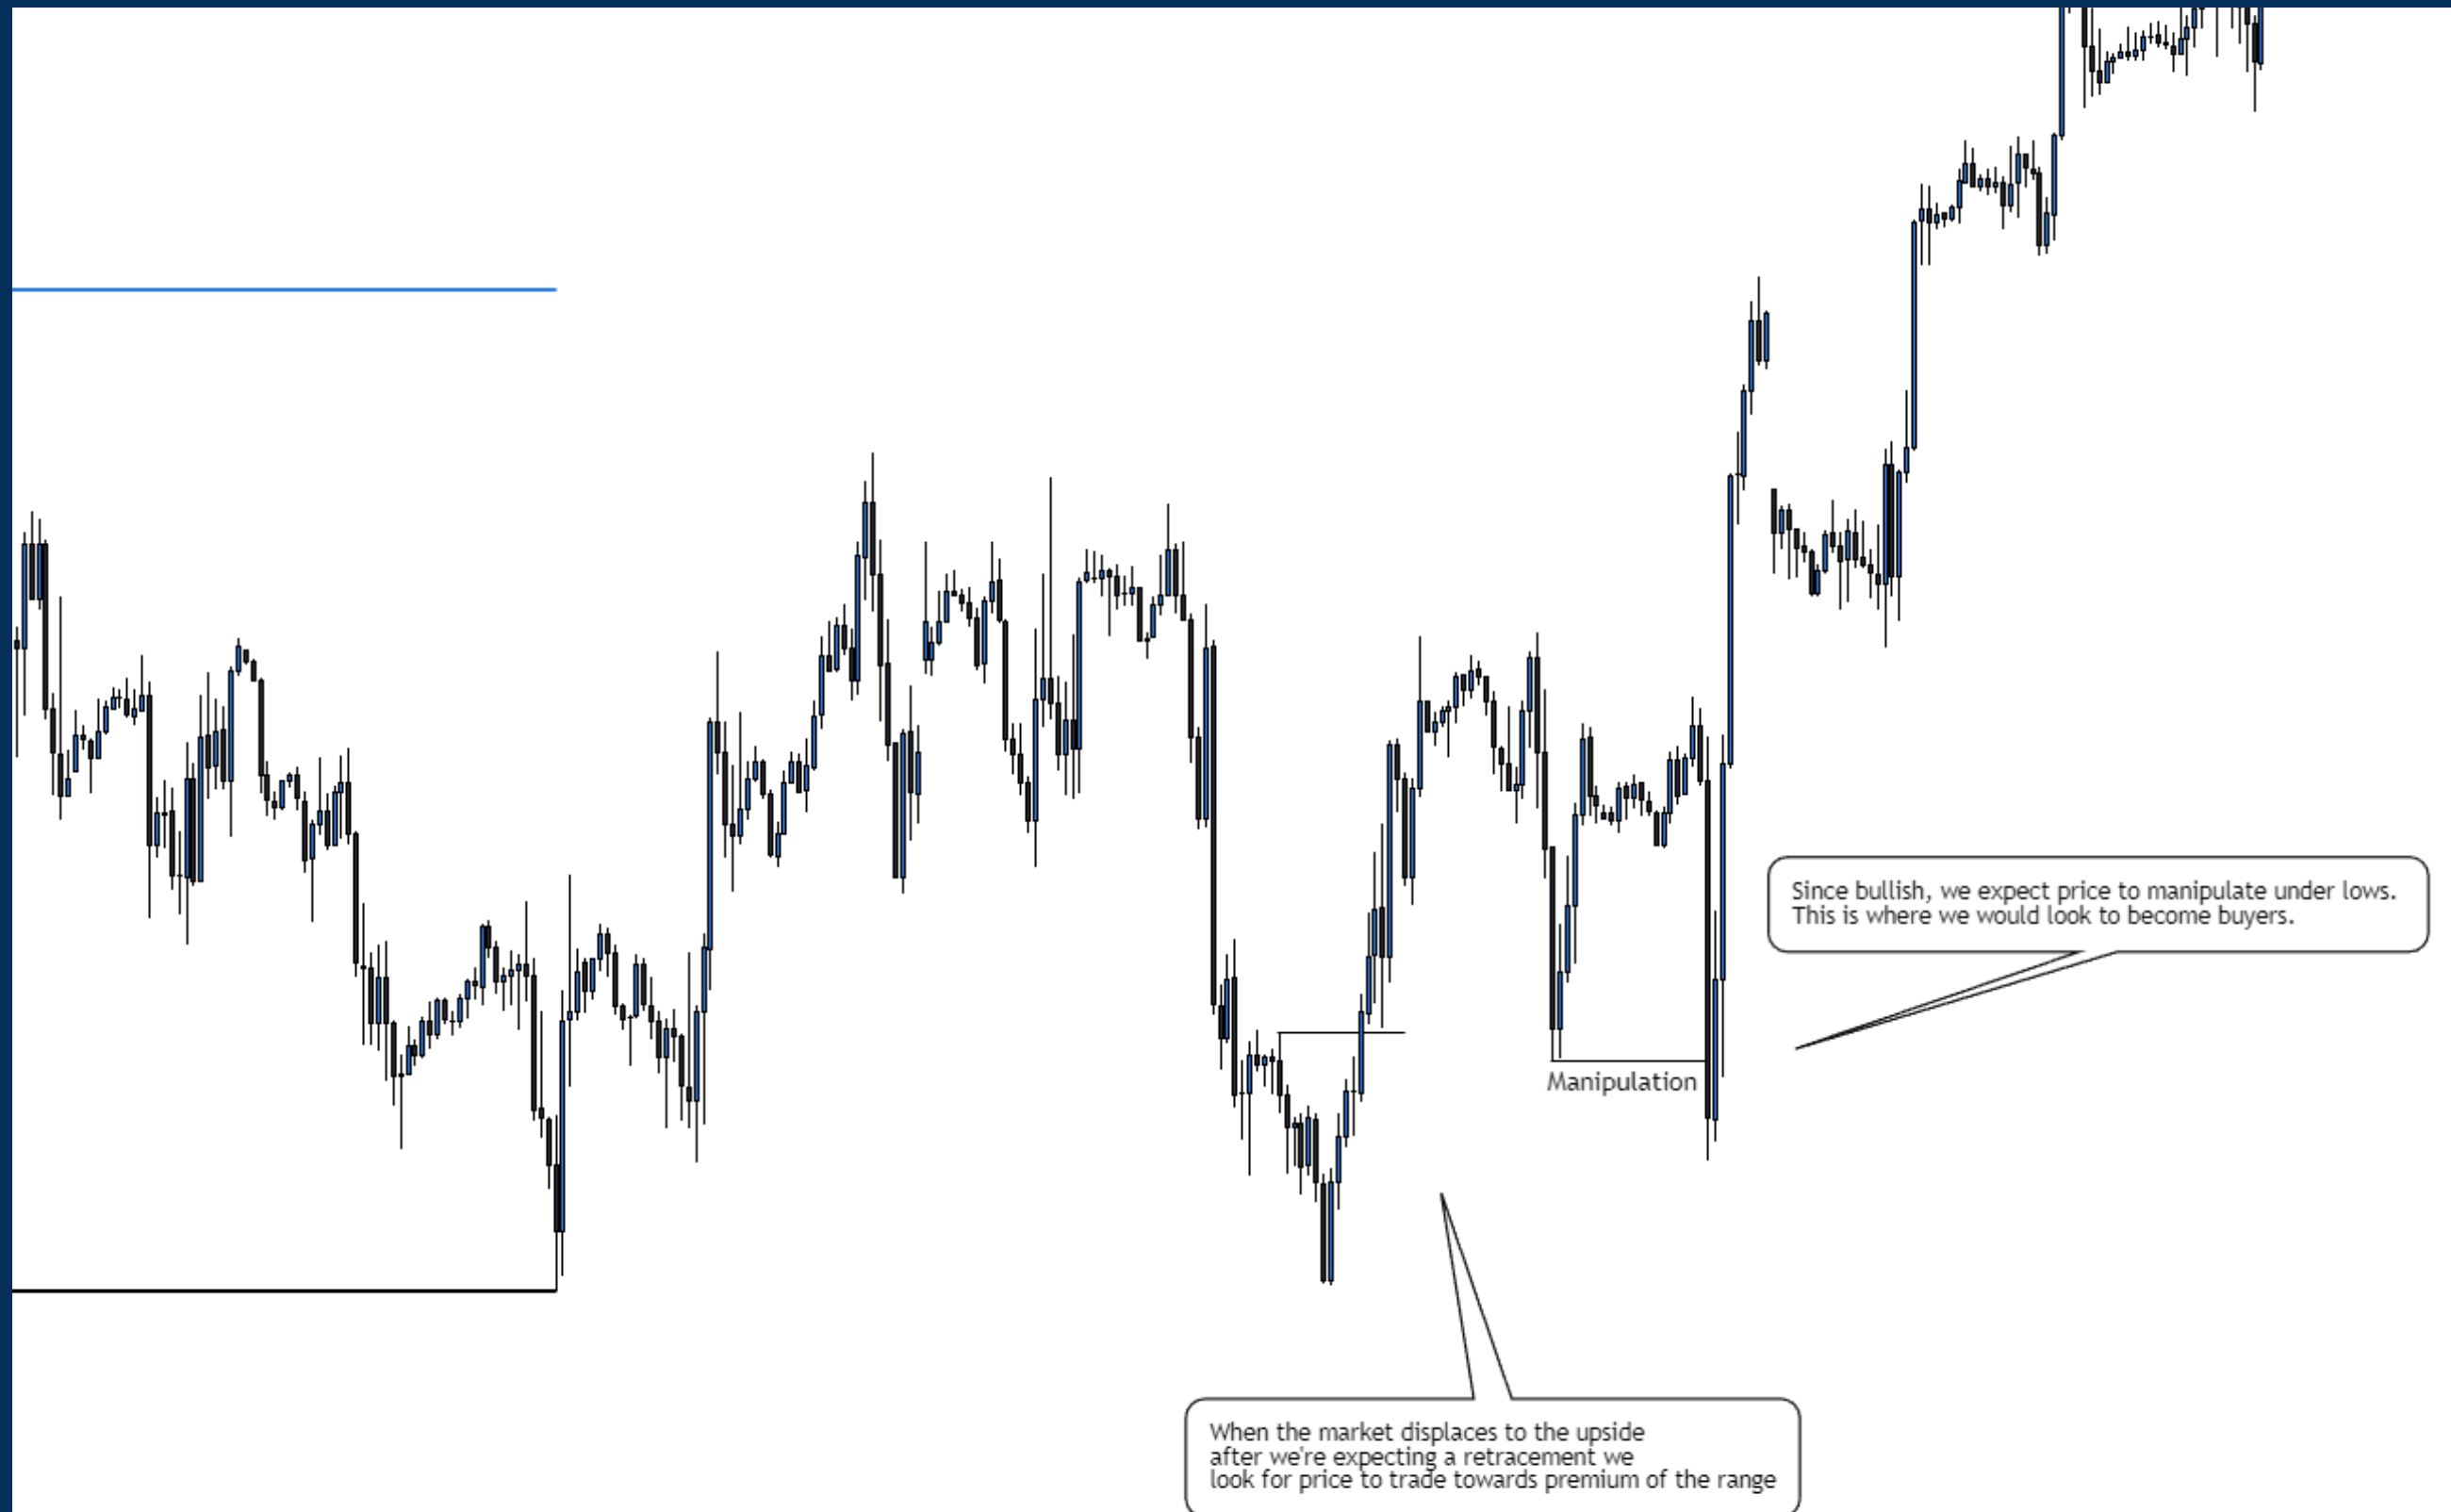

1 Look at daily chart for bias, look at most recent impulse for bias, premium/discount

ALGORITHMIC ANALYSIS STEP 2

- Map out liquidity on H1 or M15 chart only.
- If bullish, buy under lows.
- If bearish, sell above highs

ALGORITHMIC ANALYSIS STEP 2

STEP 1

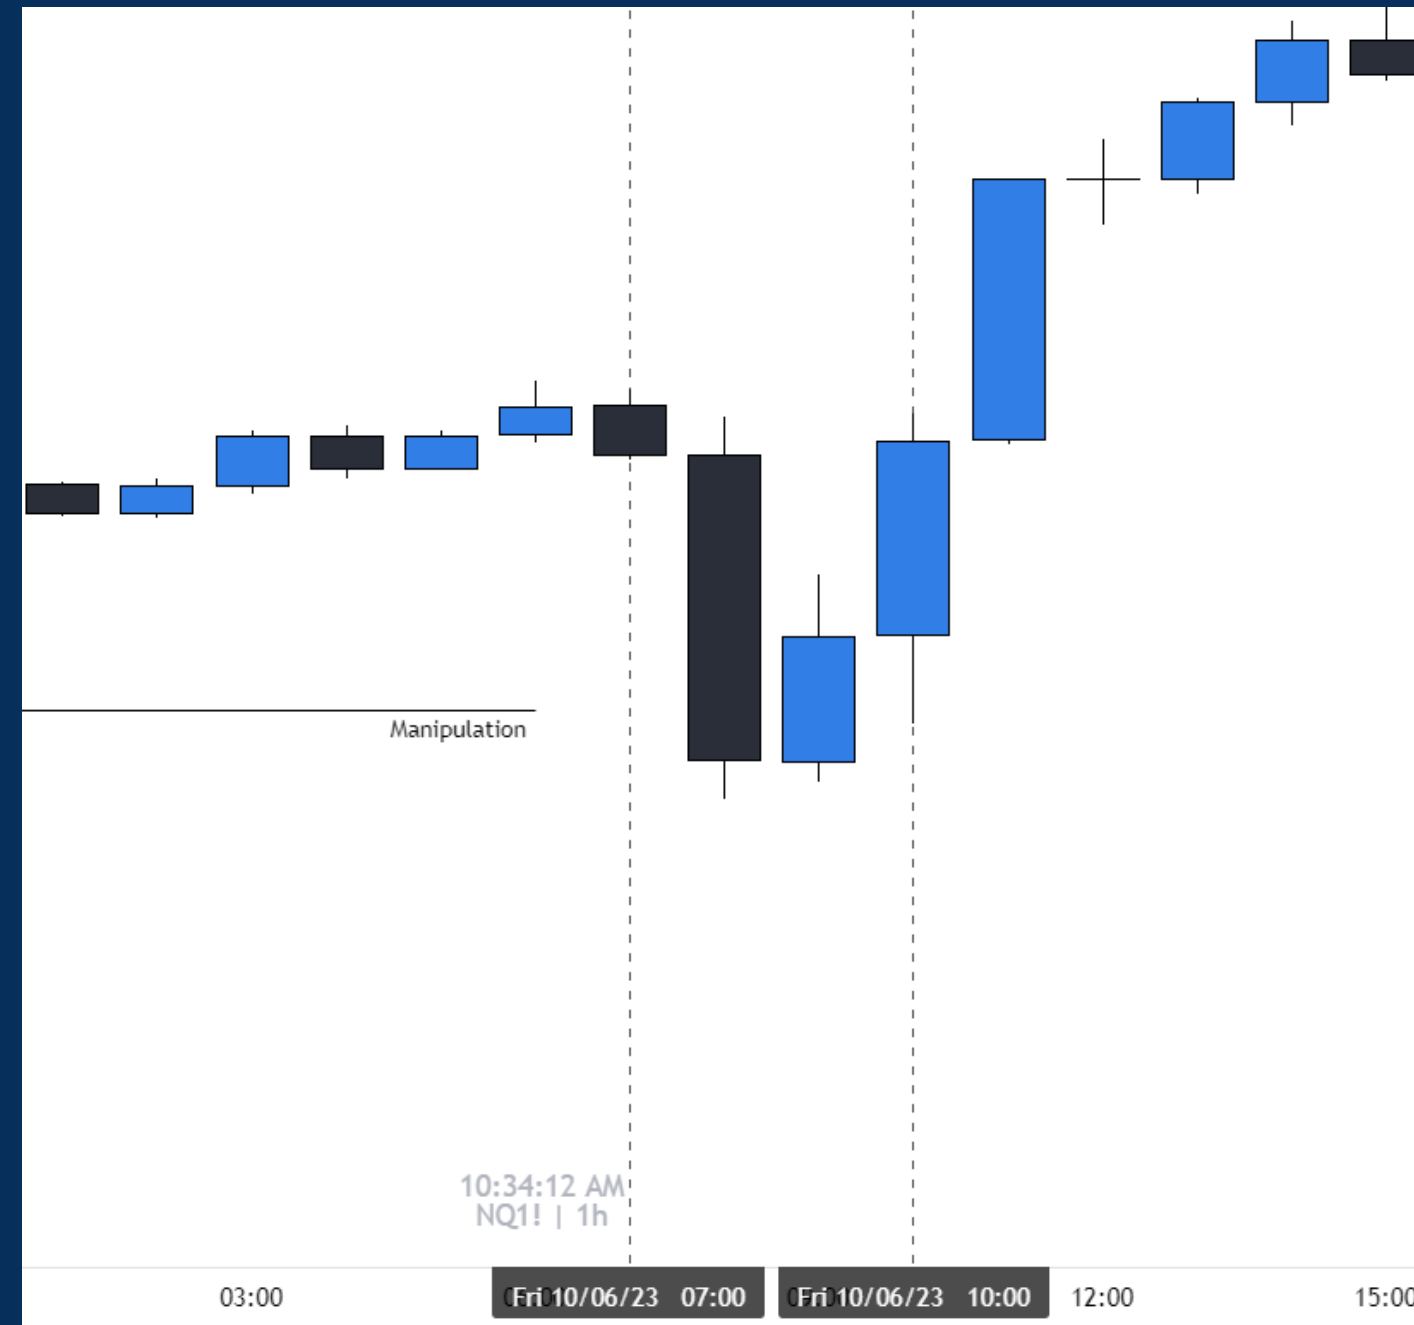

MANIPULATION VS DISPLACEMENT

STEP 2 TIME

- Only watch for manipulation during 130–430 EST for London and 730–1030 for NY session

STEP 2 TIME

STEP 3 PUTTING IT ALL TOGETHER

- Wait for pro bias manipulation
- If the candle that takes liquidity immediately takes the previous candle, can enter trade
- Minimum 2R, if not then go to LTF (see next slide)

STEP 3 PUTTING IT ALL TOGETHER

- Wait for market structure shift to confirm liquidity raid
- Enter on retrace in FVG
- Target the draw on liquidity from H1/M15
- Re entry throughout move is fine as long as minimum 2R

THANK YOU

Make sure to subscribe because this is the third of a five part series that will give you everything you need in order to become a profitable trader using the simplest strategies you will find anywhere.

WORK WITH ME

If you watched this video, or any of my other videos and thought:

“I wish I could have this guy with me while I trade to save me from losses and point me in the right direction”
